Capabilities Statement

“Don’t be the *only* one in your circle to know CPR, *you* might be the one who needs it.”

Capabilities

- American Heart Association Basic Life Support Cardio Pulmonary Resuscitation (AHA BLS CPR)
- For Adult, Child and Infant
- Proper use of an Automated External Defibrillator (AED)
- American Heart Association Basic First Aid
- Heimlich Maneuver/Choking

Company

Established in 2018, Revive In Time CPR was started as a passion to get the basic fundamentals of prolonging if not saving a life of one in need. We are a Veteran owned company. We teach and certify AHA BLS CPR on adults, children and infants to include the proper use of an AED. We teach the Heimlich maneuver and additional techniques to

relieve a choking victim. We offer SAME DAY CERTIFICATION and best of all, WE COME TO YOU! We specialize in large groups and we only use the highest quality training equipment including knee pads.

Attributes

We provide the highest quality CPR training and equipment. Rest assured, with the completion of our course, you and your employees will be confident in your skills learned. Students will have the most realistic training available with our advanced feedback manikins. Its clicker mechanism increases the student's confidence in administering adequate compressions. Our AED'S are state of the art with clear, calm voice prompts that guide students through proper usage while a chest compression metronome encourages students to compress at the Emergency Cardiovascular Care (ECC) recommended rate. This gives our students an accurate scenario for what it's like using an actual defibrillator.

Marcus Barber (Founder, President and CEO) has more than 25 years' experience teaching AHA BLS CPR w/AED. He served his country in the US Navy for 20 years as a Helicopter Crew Chief and Rescue Swimmer. He retired from active duty honorably in 2018. He holds a bachelor's degree from Saint Petersburg College. Below are a few of our current partners.

CPR is for everyone, here are just a few we train.
